"this ep is a collection of past unreleased tracks partly made in 2001 & 2002. some elements are older, for example the melody on the first track was composed 5 years ago on my first keyboard. i chose to entitle it the parthenay ep, because parthenay is the small town where i come from and i like the way it sounds, a bit like an english word. i'm happy to collaborate with 'autres directions in music' because stéphane is a nice guy with beautiful shoes and i like the fact that people can make their own selection and have my tracks for free." melodium / melodium@voila.fr  
melodium would like to thank Vio, stEph/, remixer & mr hum hum. feedbacks are appreciated.

feedbacks are appreciated too.

autres directions in music is a web-label. available records on adim can be downloaded for free, the artists involved having agreed to that. original works and creations belong to the artist alone. cd covers are available for downloading and printing. records can thus be burnt on cd, copied on a minidisk, saved on a hard disk, etc. in the same way, anyone can create his own cd cover or print the available one on white cardboard paper, or print it on coloured cardboard paper... it is up to everyone to do according to one's own wishes. DIY.
